
Title: Denizens of the Abyss

Author: Blackstaff

There are many monsters and deamons in the Aybss. From imps to deamons and Balrons they range in size and power. I am now going to tell about the Aybss natives.

Imp- Imps are a mixture between deamons and mogbats. They usually serve as servants and minions of deamons. They are usually sent to do a deamons dirty work spying assassination, etc..

Deamons- Deamons are the main creature that dwells in the Aybss. They'r very large, strong and smart. This makes them very skilled at both magery and melee. They wield a giant broad sword sometimes weighting over a ton. They follow an hierarchy but have no loyalty to each other. There are many different breeds of deamons from lesser deamons to the mighty Balrons.

Balrons- Many people think Balrons are unique by themselves their own creature. But Balrons are in fact sons of the daemon race. There are much more powerful than these lesser daemon kin. They are grandmasters of magic. Only powerful legendary warriors have slain Balrons single handedly. There are also many different famous creatures in the Aybss.

Nostur'yl- Nostur'yl is one of the mighty lords of the Aybss. He is so powerful that even balrons look weak next to him. Many years ago the Oracle of Wind imprisoned Nostur'yl. He has now escaped and had the oracle assassinated. He is trying to use the power of the obsidian post to open a gate to the Aybss.

Phakaebrus- The daemon Phakaebrus is a renegade daemon. He left the Aybss to plague Britannia with his minions. Him and his minions were slain by the likes of GreyPaw, Syndicate, Order of the Silver Dragons and many others.

There is many other creatures and famous

deamons that dwell in
the Aybss but they
can not be put in one
book.

When studying
the Aybss beware.
